EDUCATION

Florida International University, *Bachelor of Arts in Computer Science* Miami, FL | Exp. Grad. August 2027

GPA: 3.97 | Dean's List: August 2024 - May 2026 | Micro-credentials: Leadership Agility, Fundamentals of Robotics

Relevant Coursework: Cybersecurity (Codepath), Data & Discrete Structures, Algorithm Techniques, Computer Architecture, Operating Systems, Network Security, Information Technology, Quantum Computing, Artificial Intelligence, Cloud Computing

SKILLS

- **Technical:** Threat Analysis, Vulnerability Assessment, Incident Response, Security Hardening, Risk Management
- **Tools & Technologies**: Wireshark, Splunk, Linux, GitHub, Virtual Machines, Jupyter Notebook, Qiskit, Microsoft Office
- **Programming Languages**: Python, Java, C, SQL
- **Languages**: Spanish (Native), English (Fluent), Portuguese (Basic)

CERTIFICATIONS & TRAINING

- Google Career Professional Certificate in Cybersecurity — *Coursera* | July 2024
- Cybersecurity Intelligence & Information Policy — *Jack D. Gordon Institute for Public Policy (FIU)* | In Progress
- Cloud Foundations — *AWS Academy* | In Progress

PROJECTS (PORTFOLIO)

TCP Client-Server Chat Application (Networking Project) | September 2026 GitHub | View Project

- Built a concurrent TCP chat application in Python using low-level socket programming, implementing separate control and data connections to support multi-client communication, user sessions, and structured server responses.
- Engineered a multithreaded server using Python threading, sockets, dynamic port allocation, and thread-safe shared state, supporting broadcast messaging, private messaging, unique username validation, and client lifecycle management.
- Validated the application with **3** simultaneous clients across **10+ functional and edge-case scenarios**, including duplicate logins, malformed commands, invalid recipients, unexpected disconnections, logout notifications, and username reuse.

Grover's Search Algorithm Simulation (Quantum Computing Project) | May 2026 GitHub | View Project

- Implemented Grover's search algorithm in **Qiskit** for an unstructured 16-element search space, applying $O(\sqrt{N})$ theoretical query complexity compared with O(N) classical search.
- Designed and integrated key quantum components, including oracle construction, phase inversion, reversible computation, and amplitude amplification (diffuser operator) using a 9-qubit architecture.
- Achieved a **95.1%** target-address measurement rate (974/1,024 shots) after three Grover iterations in Qiskit simulation.

Zero Trust Policy Analysis: Inconsistent Implementation (Cybersecurity Project) | December 2025 GitHub | View Project

- Conducted an in-depth policy analysis on Zero Trust Framework implementation across U.S. public and private sectors, evaluating challenges related to governance, legacy infrastructure, and organizational adoption.
- Analyzed cybersecurity architectures using the **NIST SP 800-207 framework,** incorporating case studies including the U.S. Department of Defense Zero Trust Strategy and Google BeyondCorp.
- Developed policy recommendations focused on cyber resilience, identity-based security, and public-private collaboration.

PROFESSIONAL EXPERIENCE

Florida International University - Knight Foundation School of Computing and Information Sciences Miami, FL

Student Assistant Grader - Computer Architecture Course (CDA 3102) August 2026 - Present

- Evaluate Computer Architecture coursework for **37** students using instructor-defined rubrics, problem-solving methodology, and supporting work across student submissions.
- Identify errors in technical solutions and provide structured, rubric-aligned feedback to support accurate grading.
- Coordinate grading workflows with faculty through Canvas, GitHub, and recurring reviews to maintain evaluation standards.

Student Assistant Grader - Quantum Computing Online Course (COT 4601) September 2026 - Present

- Evaluate Quantum Computing coursework for approximately **20** students using instructor-provided solutions while developing assignment-specific grading rubrics to standardize evaluation and improve grading fairness.
- Collaborate with a fellow grader to align grading decisions and maintain consistent evaluation standards across the course.
- Review midterm and final exam drafts by providing faculty feedback on timing and overall assessment feasibility.

LEADERSHIP & AFFILIATIONS

INIT - Community Member August 2025 - Present

- Participate in professional development workshops focused on career readiness, technical communication, and hands-on skill building, while engaging in hackathons such as ShellHacks to develop projects and connect with industry experts.

CodePath - Cybersecurity Community Member | Remote May 2025 - Present

- Develop hands-on skills in threat analysis, network defense, and vulnerability assessment through real-world cyber labs.
